DEAR COLLEAGUES,

Welcome to Cluj-Napoca, to the 5th edition of **The International Conference Progress in Uro-Oncology!**

Previous years we have achieved a multidisciplinary approach of uro-oncological pathology. This year, the urologists, oncologists and pathologists coming from eight European countries will achieve a monothematic approach: bladder cancer. Our initiative to broadcast from the operating room open, laparoscopic and robotic procedures like radical cystectomy with ileal neobladder seems probably courageous, but we are confident that the teams of surgeons will exceed expectations. We also intend to approach oncology procedures that are found at the interface of several specialties: surgery, radiotherapy, interventional imaging. In parallel, we will be close to the medical students who will organize the second edition of the conference of Students' Association of Robotic Urologic Surgery.
